

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) A method for executing ~~transactions in a system that enables~~ financial transactions through a wireless ~~communication~~ telephony network, wherein a payment is sent from a payer's mobile telephony communication device via said network to a transaction processing platform connected to the wireless telephony network, to be credited to an account of a payee, and a request for approval is sent from said transaction processing platform via said network to a payee's mobile handset or connectable electronic telephony communication device of the payee, when a simple the payment to the payee is sent initiated by a the payer to the payee.
2. (Currently Amended) A method according to claim 1 wherein ~~the approval or rejection of payment by the payee is validated by inputting authentication data selected from the group comprising a password, finger print authentication, or voice authentication, and face authentication .~~
3. (Currently Amended) A method according to claim ~~[[1]]~~ 2 wherein ~~the approval or rejection~~ a decision to approve or reject is sent to a said Transaction Processing Platform through the wireless ~~communication~~.

telephony network in a data file containing a digital signature of the content of the file.

4. (Previously Presented) A method according to claim 3 wherein the data file is encrypted before being sent.
5. (Currently Amended) A system that enables financial transactions through a wireless ~~communication~~ telephony network, wherein a payment is sent from a mobile telephony communication device via said network to a transaction processing platform connected to the wireless telephony network, to be credited to a subscriber to ~~the~~ a financial transaction service provided through said transaction processing platform, and wherein said subscriber can open establish at least one special list of Financial Transaction Accounts associated with ~~his/her own~~ that subscriber's account that implements at least one rule for handling payments associated with that subscriber's account that are processed through said transaction processing platform.
6. (Canceled)
7. (Currently Amended) A system according to claim ~~[[6]]~~ 5 wherein the ~~particular rule or rules are~~ is checked and implemented by a said Transaction Processing Platform.

8. (Currently Amended) A system according to claim ~~6~~ 5 wherein the ~~particular rule or rules are~~ is checked and implemented by at least one of a mobile handset or a connectable electronic device and/or a Subscriber Identity Module.
9. (Currently Amended) A system according to claim 5 wherein the subscriber can remove from ~~his/her~~ said special list or add to ~~his/her~~ said special list one or more accounts directly from ~~his~~ the subscriber's mobile handset or ~~connectable electronic~~ telephony communication device, or by internet.
10. (Currently Amended) A system according to claim 5 wherein a subscriber can include in ~~his/her~~ said special list all other Financial Transaction Accounts that exist in the system.
11. (Previously Presented) A system according to claim 7 wherein ~~the all the~~ existing special lists in the system are stored in a database or in files managed and/or interfaced with the Transaction Processing Platform.
12. (Currently Amended) A system according to claim 5 wherein the special lists of ~~[[a]]~~ said subscriber are stored in part or in totality in a memory of ~~his/her~~ that subscriber's mobile handset or ~~connectable electronic~~ telephony communication device, and/or in the memory of a Subscriber Identity Module.

13. (Currently Amended) A system according to claim 7 wherein the rule defining [[a]] said special list is: no transaction allowed with accounts included in this special list.
14. (Currently Amended) A system according to claim 7 wherein the rule defining [[a]] said special list is: no request for approval required in a simple payer-initiated payment transaction if the payer's account is included in said special list.
15. (Currently Amended) A system according to claim 7 wherein the rule defining [[a]] said special list is: only simple payer-initiated payments from accounts included in said special list shall be rejected.
16. (Currently Amended) A system according to claim 7 wherein the rule defining [[a]] said special list is: no simple payer-initiated payment transaction shall be sent to accounts included in said special list.
17. (Currently Amended) A system according to claim 7 wherein the rule defining [[a]] said special list is: no payment request from accounts included in said special list shall be accepted.
18. (Currently Amended) A system according to claim 7 wherein the rule defining [[a]] said special list is a combination of at least two rules.

19. (Currently Amended) A system that enables financial transactions through a wireless ~~communication telephony~~ network wherein a payment identified by a Financial Transaction Account number of a first subscriber is sent from a mobile telephony communication device of said first subscriber via said network to a transaction processing platform connected to the wireless telephony network, to be credited to a second subscriber to a financial transaction service provided through said transaction processing platform, and wherein the Financial Transaction Account number of the first subscriber can be read automatically in a wireless manner outside of said telephony network by another said second subscriber with an automatic reading method and/or device.
20. (Previously Presented) A system according to claim 19 wherein the Financial Transaction Account number is printed in a barcode format on a card.
21. (Previously Presented) A system according to claim 19 wherein the Financial Transaction Account number is printed in a barcode format on a sticker affixed on a mobile handset or a connectable electronic device.
22. (Currently Amended) A system according to claim 19 wherein the Financial Transaction Account number is sent to the ~~other~~ second subscriber's mobile handset or connectable electronic device through an Infrared interface.

23. (Previously Presented) A system according to claim 19 wherein the Financial Transaction Account number is stored in a contactless electronic microcircuit, and can be read by a contactless reader.
24. (Previously Presented) A system according to claim 19 wherein the Financial Transaction Account number is stored in a Subscriber Identity Module which has a contactless Interface which can be read by a contactless reader.
25. (Currently Amended) A system according to claim 19 wherein the Financial Transaction Account number is sent to the ~~other~~ second subscriber's mobile handset or connectable electronic device through a short range radio interface.
- 26-28. (Canceled)
